

FASTING WORKBOOK

Guide to Filling out Your Fasting Workbook

- If you haven't already read my [In-depth Guide to Water Fasting on the Carnivore Diet](#), please check it out first
- Try to fill in the workbook with as much detail as possible. The information will be valuable for your future fasts or help others
- It's not essential but if you want to measure and record your weight and waist circumference, do it at the same time of the day using the same method. For example, you may want to weigh yourself immediately after waking up and voiding and wearing the same standard clothes. Afterward, measure your waistline
- It's best to fill in your workbook daily as you go or at the end of the day. Your memory is not infallible
- If you feel unwell at any point during your fast, please STOP immediately and contact your doctor. All the fasting benefits in the world are NOT worth it if your fast results in serious and lasting health complications
- My single best tip for a long fast on the carnivore diet is to eat a lot of fatty ruminant meats and organ meat during the week leading to your fast. Except a few hunger pangs, you will experience very few adverse symptoms if at all
- This is more of a mental challenge rather than a physical challenge. Believe in yourself, you can definitely do it, and you will be STRONGER and HEALTHIER for it
- If you find this Workbook useful, please share with your family, friends and followers, it would be much appreciated!
- Please get a clearance from your doctor before proceeding. I wrote the Guide and this Workbook to help you make your fast easier but take absolutely no responsibility for any loss, damages whatsoever arising directly or indirectly out of or in any way related to your use of the information on [allthingscarnivore.com](#) or this Workbook.
